

LEVEL I CURRICULUM AUDIT TRAINING

This three-day training program designed to prepare participants to examine and evaluate the processes and documents that exist in districts to manage the design, development, implementation, and evaluation of curriculum. These approaches form a critical foundation for improving student learning.

The CMSi Curriculum Audit Training focuses on the best thinking in curriculum, assessment, and instructional design and delivery by using five Curriculum Audit™ standards written by Fenwick English to maximize student achievement:

- Policy, planning, system structure and change
- Curriculum planning, scope, and quality of the written curriculum
- Professional development, instructional support, and student equity
- Assessment scope, feedback, and trend data
- Resource management, interventions, and system efficiency

“I am not aware of a more powerful process for improving a school district.”

**–Dr. R. Cole Pugh
Superintendent, Troup
County Georgia**

“During my 35 years as an educator, I have had no other long-term professional affiliation as helpful or as productive as that which I have experienced with CMSi.”

**–Dr. John Murdoch,
Superintendent (retired),
Idaho Falls School District
#91**

“Thank you for providing one of the best trainings I have ever attended in my 30+ years as an educator.”
–Shelley Rex, Curriculum

Along with an overview of audit premises, standards, and a discussion of internal reviews and external auditing, the program addresses topics related to managing curriculum and program design, assuring valid and reliable approaches to assessment, ensuring equal access to programs for all students, and supporting the delivery of curriculum with coaching and classroom observations.

Participants will engage in practice activities that involve evaluating samples (or their own) district policies, plans, curriculum, assessments, and data. The training asks participants to identify weaknesses in their curriculum and assessments and then develop improvement goals for their district, school, or department, based on their findings, using the criteria and concepts presented.

The strength of this training is in engaging participants with a conceptual framework and focus for approaching all aspects of delivering learning to students and attaining improvement in that learning over time. There are no quick fixes—just a solid foundation in keeping student learning at the forefront of all district functions and tasks.

Who Should Attend

Superintendents, chief academic officers, curriculum specialists, content specialists, department directors and chairs, district and campus instructional leaders, and individuals interested in becoming CMSi-certified auditors.
